

For farmers in mobile application

When farmers login with the otp after selecting farmer

So there will be a tab for them of coupons where new coupons will come and they can also see the used coupons and also it will be showed them to they save this much now like this

So if possible if qr code can generate in free for the coupon we will make it that along with the text coupon paid ,else coupon code will be only in text , it will give reminder to the farmers to use that coupon code , also it will show the in how many days coupon will be expire
